DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As per Claims 1, 11, and 14.

The present invention is directed to a method for processing an inbound document. The prior art of record fails to teach a method for processing an inbound document comprising the step of "creating a profile record for the trading partner in the profile database and populating said profile record with said extracted data, wherein the profile is automatically created only if an auto-creation flag is pre-set, and wherein the system stores an auto-creation flag for each of a plurality of interworking standards, and the system determines the relevant standard associated with the received inbound document and determines if there is an auto-creation flag set for the determined standard". The closest prior art, LeCrone et al. (US 662197 B1), Webber (US 6418400 B1), Kotamarti (US 2001/0043234 A1), Reed et al. (US 5862325 A) and Richards (US 6408303 B1), disclose

receiving documents, template creation and database flags, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

The claims which depend from the above allowed claims are allowed based on their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
